MANUAL HANDLING  
UNDERGROUND TANK CARAT S  
+ ACCESSORIES

# GENERAL

## REVIT Underground Tank Carat S + Accessories

### Revit Version

The GRAF Revit Families are created in the english version of Revit 2018.

### Revit Project

The Revit project **GRAF\_Underground\_Tank\_Carat\_S\_Family\_+\_standard\_Accessories.rvt** contains all tank and standard accessories families of the Carat S series. The families are created on the Revit category Specialty Equipment.

### How to add the families to your project

1. Open your Revit project.
2. Open the **GRAF\_Underground\_Tank\_Carat\_S\_Family\_+\_standard\_Accessories.rvt**
3. In this project, select a family.
4. In the Modify menu run Edit Family. This opens the Family Editor.
5. From here, run Load into Project (or Load into Project and Close) and select your project.  
The family is available now in the project browser of your project under Families > Specialty Equipment.  
The family types can be dragged into your drawing area.
6. You can close the family you have opened. You do not need to save it, as all families and types are still available in the **GRAF\_Underground\_Tank\_Carat\_S\_Family\_+\_standard\_Accessories.rvt**

*Alternatively, use Insert > Load Family to load the downloaded single families directly in your project.  
In this case, you do not need to open the overview project.*

## REVIT Underground Tank Carat S + Accessories

### Correct planning

For correct planning, the information in the product-specific installation instructions must be observed.

### Detail Levels

The GRAF families support the Revit detail levels Coarse, Medium and Fine.

**coarse**

**medium**

**fine**

### Connectors

Piping systems can be designed using the connectors on the tanks and accessories.

### Base of the families

The base points in the families are in x/y-direction the center, in z-direction on the bottom edge for the tanks, for accessories based on the usage of the families.

### Show Gravel

Defines the visibility of the gravel layer below the tank. This is displayed with 80 mm below the base-point of the model.
